

**A Lecture on the Nuclear Crisis in Japan: Change of Venue and Time**

Thursday, April 7, 2011 5:10 PM

From: "oregontt" <oregontt@aol.com>**To:** oregontt@aol.com

There has been a change of venue for the lectures by Leuren Moret and Lloyd Marbet. It will now be at the Mount Tabor Theater instead of Taborspace. Some members of the congregation of the church that shares the walls with Taborspace felt the subject matter was too troubling.

Please E mail me back if you plan on attending in order to help us determine how many people will attend.

Tim Titrud 503-701-3481

Portland 911 Truth Alliance Pdx911Truth.com

A Lecture on the Nuclear Crisis in Japan and how it will affect the Pacific Northwest By Leuren Moret and Lloyd Marbet.

When: 230 to 5 PM April 9th and 10th 2011

Where: Mount Tabor Theater 4811 SE Hawthorne Blvd, Portland.

Cost: \$10 at the door for each talk

BIO: Leuren Moret is a Geoscientist and international radiation expert. Ms. Moret has traveled widely working on radiation issues with members of Congress, Parliaments, and citizens groups in 50 countries. She and the Radiation and Public Health Project (RPHP) have collected over 6000 baby teeth from children living within 100 miles of nuclear power plants in the US and Japan, and reported that Strontium 90 levels are higher (from nuclear power plant emissions), than during nuclear bomb testing. Ms. Moret was an expert witness at the International Criminal Tribunal for Afghanistan in Tokyo, on the organizing committee for the Istanbul International Criminal Tribunal for Iraq, and co-authored two official War Crimes Complaints, on the illegal use of Depleted Uranium weapons in Iraq, for the Kuala Lumpur International War Crimes Tribunal for Iraq.

Bio: Lloyd Marbet. A local long time Anti-Nuclear activist and opponent of the Portland General Electric Trojan Nuclear reactor.

April 9th TALK #1 -Leuren Moret and Lloyd Marbet

"New Dangers and Lingering Effects: The Hanford, Trojan, and Humboldt Reactors "

Nuclear power has turned out to be the most expensive source of energy possible. The largest increases in autism in Washington, Oregon, and California are in the rain shadows

of the Hanford, Trojan, and Humboldt Nuclear Reactors. Because of exposure to ionizing radiation, salmon and freshwater otters in the Columbia River, and people living along the river, share similar reproductive problems with survivors of Fallujah. Without a global solution to disposal of nuclear waste, the lessons of Fukushima, and the new danger of computer sabotage at nuclear power plants, the global community must renew resistance to new and extreme dangers of nuclear power. No family, community, or country any longer can afford the real cost of nuclear power, a covert nuclear war against humanity.

TALK #2- Leuren Moret

"Scientist Leuren Moret: Japan Earthquake and Nuclear "Accidents" are Tectonic Nuclear Warfare Land Grabs"

Evidence from Gakona, Alaska, and Japan provides the evidence that HAARP was used to trigger the Fukushima earthquake, followed by computer sabotage of the emergency cooling systems by the Stuxnet virus, and the HAARP signature on the controlled pathway of the radioactive plume targeting the west coast of N. America and Hawaii, expose the economic interests behind yet another and extreme example of disaster capitalism. A new kind of nuclear war to carry out landgrabs, the destruction of Japanese and N. American farmers, and the US Navy winning the big prize - radioactive Hawaii, are all part of an economic transition in the Pacific region.
